A world class provider of
drilling technologies for the
high efficiency drilling market

© 2011 Aker Solutions

Drilling systems and technologies

Aker Solutions delivers world-class deepwater drilling technologies, systems and lifecycle services.

We have 40 years of extensive experience from offshore drilling units. Recently, we have delivered a number of complete drilling rig packages and expanded our product portfolio significantly through acquisitions and increased focus on technologies and innovations.

Aker Solutions is proud to offer support through the entire process, including engineering, manufacturing, installation and commissioning. In addition, we provide drilling lifecycle services to our customers, including spare parts, technical support, overhaul/modifications and professional rig training.

Professional training and competence are key success factors in maximising uptime and ensuring safe operation of drilling equipment and drilling rigs. These are integral parts of the quality and HSE programmes in Aker Solutions. State-of-the-art drilling equipment simulators are established in Norway, Singapore, Houston and Brazil.

We work closely with our customers to understand their needs and provide them with drilling solutions for the future.

This is Aker Solutions

Aker Solutions is a leading global oil services company that provides engineering and construction services, technologies, product solutions and field-life solutions for the upstream oil and gas industry. The Aker Solutions group is organised in a number of separate legal entities. Aker Solutions is used as the common brand/trademark for most of these entities. Aker Solutions has aggregated annual revenues of approximately NOK 50 billion and employs approximately 20 000 people in about 26 countries.

Semi submersibles and drillships, all with Aker Solutions' complete drilling packages installed
