Legacy Ponds

Customer: **British Nuclear Group**
Project: **Legacy Ponds Projects**
Location: **Sellafield**
Date: **Ongoing**
Services: **Full Alliance Service**
Value: **£5 million per annum**

Scope of Work

Aker Solutions has played a significant part in developing the Alliancing Strategy with British Nuclear Group and the supply chain to deliver the Legacy Ponds Projects.

The Legacy Ponds Projects at Sellafield are being executed by an alliance team comprising British Nuclear Group and the ACKtiv Nuclear JV, of which Aker Solutions is a major partner.

The work encompasses a series of important projects involving clean-up, decommissioning and rehabilitation of various waste storage facilities at Sellafield including Ponds Buildings (B30, B29, B31 and B315).

Description

The Ponds Alliance Team has been set up as a fully integrated team on the best person for the job principle. This strategy was driven by British Nuclear Group's desire to maximise the ability to apply expertise and innovation from the supply chain whilst removing the traditional client-contractor interfaces.

The current team size is approximately 370 of which 170 are from the JV.

The organisational change has been quite radical with many senior British Nuclear Group personnel now reporting to JV personnel.

The scope of Aker Solutions involvement has expanded across the full suite of plant projects and now encompasses front end design (sludge and ILW retrieval and processing) project management and controls, design integration and design services for mechanical, electrical, control and instrumentation packages to meet very challenging time frames.
