With more than 200 VRUs in operation throughout the world and over two decades of experience in designing cleaner technology for the oil industry, Aker Kvaerner is able to design and supply any size of VRU.

Throughout company history, Aker Kvaerner Cool Sorption has had a reputation for immaculate on-time delivery. Through our flat, modern company structure, our engineers are always up-to-date on the status of a given project. This, along with a good relationship with professional subcontractors and suppliers, ensures that we are always able to deliver the turnkey projects on time.

Our customers have always appreciated the quality of our work and our post-project service. Most customers return to Aker Kvaerner Cool Sorption when it is time to replace an existing VRU.
