Aker Solutions

Quality, Performance and Transformation Policy

Objective

Aker Solutions will drive the transformation to a more agile, lean and digital culture and enables the energy transition by having a zero tolerance to defects through sustainable learning

Commitment

- We shall transform as part of market change to capture value and create results for all stakeholders and customers

- We shall renew work methods using digitalization, to improve our offerings

- We shall set clear goals to ensure that we deliver on our strategy and systematically manage and improve performance

- We shall design our processes to secure safe, reliable and efficient operations and focus on cost and flow efficiency in all activities

- We shall secure sustainable learning by systematically reflecting on all our experiences and update our processes accordingly

- We shall provide the right level of resources to ensure that this policy is implemented appropriately

Behavior

- We take personal and collective responsibility to build quality and drive performance into our work by always using and continuously improving our Management System

- We understand and comply with the Management System, applicable laws and regulations

- We assess and manage risks that impact our ability to meet our stakeholders' and customers' needs and expectations and we measure transformation and improvement initiatives to ensure full performance

- We openly communicate and visualize performance, learnings and challenges, and seeking the most efficient solutions and learn from our experiences

- We share, learn and implement best practices in our Management System through the standardization and globalization of processes

- We actively engage in continuous improvement by proposing improvement ideas, securing end-to-end flow efficiency in order to minimize non-value adding activities
